

सत्यमेव जयते

उप-राष्ट्रपति, भारत

VICE-PRESIDENT OF INDIA

MESSAGE

I am happy to know that the first Indian mission to the moon, Chandrayaan I has been successfully launched from Sriharikota Range putting into orbit 1,400 Kg. satellite by the PSLV- XL launch vehicle. Our space scientists have made the country proud with this extraordinary achievement that expands our scientific knowledge about the moon and demonstrates the high level of technological capabilities of our scientists.

I congratulate our space scientists and all those associated with this successful mission to the Moon for this splendid achievement.

(M. HAMID ANSARI)
